

What is internet of Things

How is it works?

The internet of things, or, IoT, is a system of interrelated computing devices, mechanical and digital machines, objects, animals... the IoT describes the network of physical objects - a.k.a "things" - that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the internet.

# Internet of things

Top internet - of - Things (IoT)

- ① Connected appliances.
- ② Smart home security systems.
